12th Street West (5 – 6 Avenue) Construction Complete

Roadway now opened

The City of Prince Albert wishes to announce that 12th Street West between 5th and 6th Avenues has now been opened. Major construction work was scheduled for 2010 which included the replacement of the sanitary sewer main, water main and a number of lead service connections as well as surface construction which included pavement, curbs and gutter works. SaskEnergy also replaced gas service connections prior to the hard surfacing of the street.

Total costs for this project were over \$300,000 which was partially funded through the province's Municipal Economic Enhancement Program (MEEP) with the remaining costs billed to property owners as a Local Improvement.

The City wishes to thank residents for their patience and understanding during the lengthy construction process.
