## **Traffic Calming Implemented at 10<sup>th</sup> Avenue West and 28<sup>th</sup> Street**

*Traffic channelizing barrels to reduce speed and improve safety.*

The Public Works Department would like to advise that traffic channelizing barrels have been installed at the intersection of 10<sup>th</sup> Avenue West and 28<sup>th</sup> Street (the corner by the Alfred Jenkins Fieldhouse). The work was completed in order to reduce speeds around the corner as well as mark the proper lanes for traffic.

Safety has been a concern at this intersection since its implementation due to its size and traffic flow patterns. The channelizing barrels are a temporary measure until paint markings can be completed in the spring.
