RE: Repaving – Dent Crescent & Dent Avenue

The City of Prince Albert Public Works Department would like to advise residents of the upcoming repaving of Dent Crescent & Dent Avenue. The project includes street milling, select sidewalk repairs, and street paving. See the attached map.

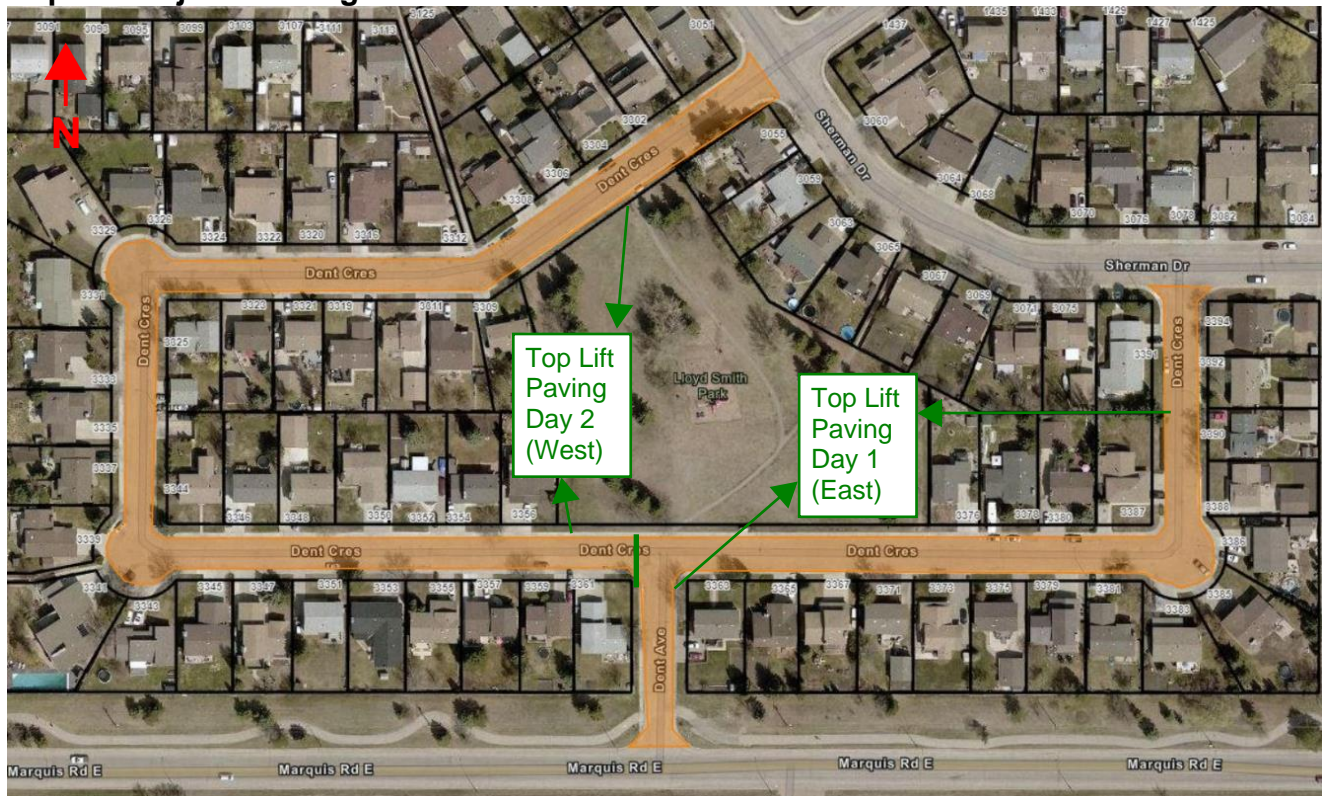

1. **Project Timeline:** June 23rd to July 11th weather permitting.
 - a. The work will occur in stages.
 - i. Sidewalk and Curb Repairs.
 - ii. Milling of the existing asphalt.
 - iii. Paving of leveling lift.
 - iv. Paving the final top lift (Dent Ave and Dent Cr **East** of Dent Ave)
 - v. Paving the final top lift (Dent Cr **West** of Dent Ave)
2. **Impacted Areas:** The work will occur in the **orange** zone attached.
3. **Limited Driveway and on-street parking access:**
 - a. During Sidewalk/Curb Repairs you may park on-street following these conditions:
 - i. Limit street parking as much as possible. The owner of the vehicle should be nearby when street parking as you may be asked to move during the day. If the owner is not around, the vehicle will be towed.
 - ii. **Do not** park within 20 meters of any pink spray marks on the sidewalks.
 - iii. If there is No Parking Signs placed in the boulevards, it means that there is no street parking for the entire block until the sign is removed. These will go up when the crews will be milling or paving the street. The signs will be placed the day before the work starts.
 - iv. Some of the milling and paving operation may occur at the same time as the concrete work. Watch for the no street parking signs.
 - b. There is no street parking in the **orange** zone or 30 meters of the zone in all neighboring streets and avenues during milling or paving operations.
 - c. During the paving days, access to driveways will be limited. Limit access as much as possible.
 - d. During paving of the top lift road access will be restricted for at least 1 day. Top Lift paving will be completed in two stages (east and West) to ensure that residents have street parking on either the West or East leg of Dent Crescent throughout the project.
4. **Freshly Oiled Asphalt and Tack Oil** can pick up on your vehicle and diminish the quality of the paved surface. It is very important that you **do not** drive on a freshly paved or oiled surfaces. Allow 3 hours of the asphalt being placed before driving on it. Do not drive on Tack Oil at anytime.

5. **What can I do to prepare?** Arrange for an alternate parking spot for vehicles for the duration of the project if needed. It will not be possible to advise exactly when your driveway will be closed.
6. **Garbage and Recycling Pick-up** will continue as scheduled. Place your bins on the sidewalk instead of the street.
7. **Landscaping and Trees:** No trees are anticipated to be removed as part of this project. If your landscaping is impacted, your property will be added to the boulevard list to be scheduled for repair. At that time, further communication will be issued for care and maintenance of the landscaping.

If you require further information with respect to this matter, please do not hesitate to contact Evan Hastings, Capital Projects Manager at Public Works at (306) 953-4900.

Yours truly,

Evan Hastings, B.Sc., C.E., EIT
Capital Projects Manager
