28 Street East (2-3 Avenue) – Watermain Relining

The City of Prince Albert Public Works Department would like to advise residents of the upcoming underground utility work on 28 Street East between 2nd and 3rd Avenue East. The work includes the relining of the existing 1973 cast iron water main with a structural liner, bringing the main to a like new condition without the need to excavate the entirety of the roadway. The relining work requires excavation of pits at each end of the block to access the watermain as well as at pit near the middle near the existing hydrant.

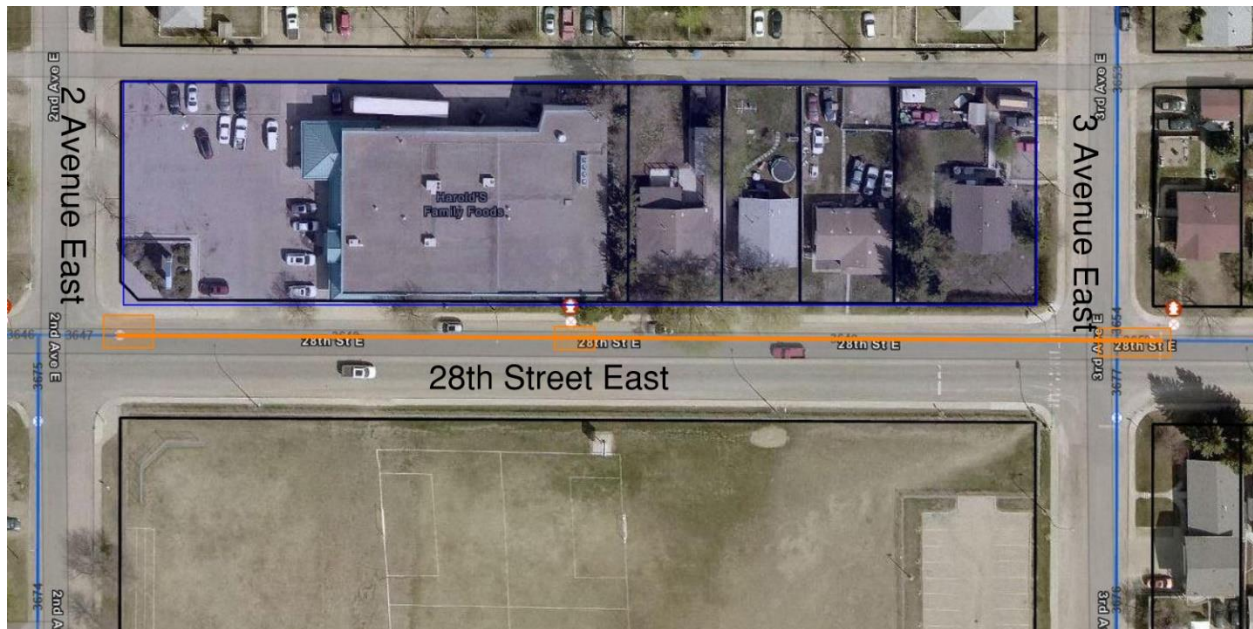

1. **Project timeline: July 2nd to August 8th**, weather permitting.
2. **Impacted Areas:** Watermain relining will take place in the **orange** zone. You are receiving this letter because you either reside within the construction zone or within a 30-meter radius. The properties that will have their water impacted throughout the duration of the project are outlined in **blue**.
3. **Water Services:** To ensure that you continue to receive water throughout the project, the City will be providing above ground water services connected to your outside tap. The City will be inspecting the taps to ensure that your outside tap is functioning and is not a frost-free tap. If it is a frost-free tap, the City will replace it and reinstate it after construction completion. Your shutoff valve located within your house will also have to be in good working condition.
4. **Water Meters:** To ensure that water does not backflow from your house to the main while it is being relined, your water meters will have to be disconnected. You will, for the project duration, be receiving your water through your outside tap. The Contractor will be completing the water meter disconnections between **July 2nd** and **July 8th**. This will require you to provide access to the contractor. (Bylaw No 37 of 2017). Failure to allow access will result in your property not having water during the relining project. The meter will be reinstated after the project is completed.
5. **Limited Driveway and on-street parking access:**
 - There may be parking restrictions on the north and south side of the street in the **orange** zone, signage will be in place to identify these locations.

6. **Traffic:** Two-way traffic will be maintained, when possible, throughout the project. At times detours may be required to facilitate safe construction.
7. **Garbage and Recycling Pick-up** will continue as scheduled. Place your bins on the sidewalk instead of the street.
8. **Landscaping and Trees:** No trees are anticipated to be removed as part of this project. If your landscaping is impacted, further communication will be issued.

If you require further information with respect to this matter, please do not hesitate to contact Public Works at (306) 953-4884. For more information on this project or any other capital projects throughout the city, please visit www.citypa.ca/capital-projects/.

Yours truly,

Evan Hastings, B.Sc., C.E., EIT
Capital Projects Manager
