

Spring Ice Safety

The Prince Albert Fire Department would like to remind the citizens of Prince Albert to be careful when near water and ice.

Stay off ice.

Spring ice is rotten ice.

Stay away from moving water.

Moving water can quickly knock children off their feet. River and stream banks are unstable and prone to collapsing.

Supervise children.

Children with access to ice or water need close, constant supervision.

Know your neighborhood.

Speak with your children and family about ice, water, and flood risks in your neighborhood.

Beware of snow covered ice.

Heavy snow insulates ice and prevents it from freezing.

See someone on ice? Call 911.

Stay on shore. Do not go on the ice.

Spring ice is unpredictable and dangerous to even the people with training and equipment.
