### Parking Agreement Notice

Snow removal for long-term designated parking is limited due to the lot never being vacant. It is the airport's procedure to not remove snow within the parking stalls unless there is at least three (3) adjacent stalls open to facilitate powered mobile equipment access and to not remove snow within two (2) feet of a parked vehicle to prevent damaging the parked vehicles.

By purchasing a long term designated parking permit, I understand that it is only valid for the airport stall assigned. A map is available at the Customer Service counter at City Hall or on the Prince Albert Airport website. The permit must be attached to the rearview mirror of the vehicle occupying the stall and be completely visible while parked. Failure to do so will result in a parking ticket and/or towing.

The unauthorized reproduction, distribution or alteration of any parking permit is illegal and will be prosecuted.
